

# ASCIO WIRELESS

## "VALUE FOR THE COMMUNITY"

As a Wireless Integrator, ASCIO Wireless has been working closely in assisting local city and town municipalities, and internet service providers (ISP) with their infrastructure needs. We would like to offer your organization the same opportunity by either expanding upon your current infrastructure or by creating a cost effective solution to become your own Wireless Internet Service Provider. ASCIO has over 20 years of radio frequency (RF) experience and is globally recognized as one of the leading integrators of wireless solutions.

ASCIO Wireless can provide a complete turnkey solution for your networking needs. Whether you are looking for the flexibility of a wireless Local or Wide Area Network, the dependability of a point-to-point wireless back haul link or the cost savings and quick implementation of a point-to-multi-point wireless network, ASCIO can provide you with the answers, which you have been searching.

## "GENERATE MORE"

### Value added services for residential & commercial customers:

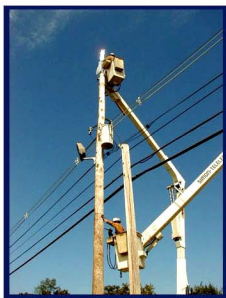

- † High speed internet service.
- † Rapidly deployable infrastructure.
- † Inexpensive alternative to customary solution.
- † Proven reliability and return on investment.
- † Standardized solution for easy deployment.

## "CONTROL YOUR OWN DESTINY"

DON'T OPERATE ON SOMEONE ELSE'S BACKBONE

### Remove or reduce monthly overhead:

- † Deploy high-speed wireless bridges between buildings.
- † Share service provided to one location (no additional loop costs).
- † Connect multiple buildings (Point to Multi-point).
- † Reduce maintenance of LAN or WAN.

### System Costs:

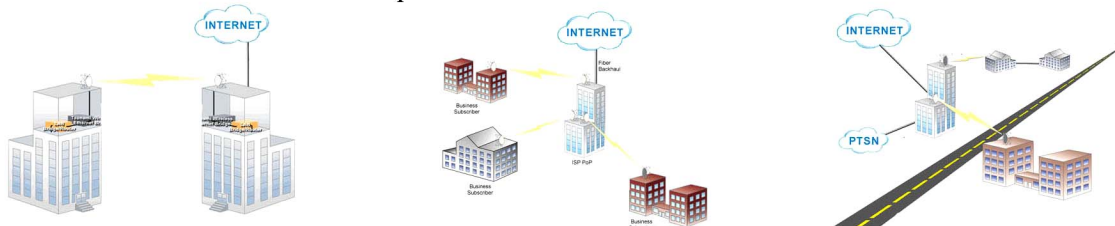

- |   |                       |
|---|-----------------------|
| † ISP Transmission POP (DHCP)                   | Starting @ \$3,650.00 |
| † Residential Customer Equipment                | Starting @ \$ 175.00  |
| † Commercial Customer Equipment                 | Starting @ \$ 400.00  |
| † Point to Point Bridge                         | Starting @ \$1,950.00 |
| † Point to Multipoint Bridge (1 Base, 2 Client) | Starting @ \$5,280.00 |

### "Contact us today for a Free Consultation"

We will put it in terms that make Dollars and Sense

### Technical information:

- † Support DHCP or Static IP addressing.
- † Licensed & Unlicensed Frequencies.
- † Standard protocols IEEE 802.1xx.
- † Speeds from 256 Kbps to 1,000 Mbps.
- † Security through encryption, authentication, or filtering.
- † Distances up to 15 Miles.
